Lump disappeared after taking HDI products

After 2 years of my surgery in 2015, I discovered another lump in my breast again. In the first surgery, the lump was removed from my right breast and then a year later for the left side. The lab test result showed that this lump was growing rapidly as the previous treatment did not fully destroy the active cells since it had reappeared again. Due to this, I started taking HDI Clover Honey, Bee Propolis, Royale Jelly Liquid, Pollenergy 520 and Propoelix™. Initially after consumption I still felt the pain in the breast area with throbbing sensation but later the pain subsided when I increased my product intake and the latest test result showed that the lump was gone.

服用HDI产品后肿块消失

手术两年后的2015年，我的乳房再次发现了另一个肿块。在第一次手术中，肿块从我的右乳房被切除，一年后又切除了左侧的肿块。化验结果显示，由于先前的处理没有完全破坏活性细胞，导致该肿块又重新长出，因此肿块生长迅速。于是我开始服用HDI苜蓿蜂蜜、蜂胶、液状蜂皇乳、520活力花粉和 Propoelix™。最初服用后我仍然感到乳房区域有抽动的疼痛，但后来我增加了产品摄入量后疼痛减轻了，最新的测试结果显示肿块消失了。

HDI products helped reduce blood sugar and cholesterol levels

At 58 years old, my mother had been suffering from diabetes for the past 3 years. She consulted the doctor regularly despite feeling nauseous after taking the medication. On 24 Aug 2021, the lab test showed that her blood sugar level was as high as 357mg/dl (19.8mmo/L) and cholesterol level at borderline 220mg/dl. She was weak and had no appetite, suffered from aching joints especially on her knees and soles of her feet.

On 23 Sept, she started taking HDI Clover Honey, Pollenergy 520, Royale Jelly Liquid and Propoelix™. After 2 weeks of consumption, her blood sugar level had decreased to 157mg/dl and cholesterol level to 202mg/dl, almost back to normal! In addition, she no longer felt the joint pain, her appetite improved and her facial skin became firmer. She is now able to carry out her daily activities.
