

Do you know that bee hive is probably the most sterile place on earth?

It's because of propolis.

As propolis is well-known for its strong anti-bacterial and antioxidant properties, it's commonly referred to as the "Russian Penicillin", or simply, Nature's Most Powerful Antibiotic. Besides being beneficial for the bees, this medicinal marvel from the hive is great for human beings as well.

Unlike bees, we have an intricate immune system to protect us. But yet, we are still falling sick so often. Imagine the environment we live in today, exposing us to millions of bacteria, viruses and toxins. Every now and then, we are affected by serious flu viruses which spread across countries, killing people worldwide. This problem is just going to get worse. Our human immune system is NOT able to handle the large number of germs that are in the environment today.

- **Propolis's main benefit lies in being able to help boost the body's natural immune system.**

Chemical antibiotics weaken your immune system over time as bacteria become resistant. But propolis is different. It helps to boost your body's immune system NATURALLY. It increases production and activity of immune cells. With its strong anti-microbial properties, it helps kill and slow down the growth of bacteria, fungi and viruses. In this way, you don't fall sick so easily. And even if you do catch a cold, you will recover much faster with propolis!

- **Propolis has also been found by studies to have a strong antioxidant activity,** which will help you fight oxidation by neutralizing free radicals in the environment, giving you the protection you need. Anti-oxidants are also believed to play a role in preventing the development of chronic diseases such as cancer, heart disease and even Alzheimer's, which are very common today.

- **Propolis can also help if you have wounds or inflammation in your body.** Inflammation is a sign of your body's reaction against infection. Propolis has good anti-inflammatory and promote healing.

- Many people today may also face cholesterol problems, which can be due largely to our lifestyles and diets. If you face this problem, **propolis can help lower your bad cholesterol (LDL) and triglyceride levels, while promoting good cholesterol levels (HDL).** This can help with your heart at the same time.

- **Propolis may also be able to help with gastric tissue damage, regulating of gastric volume, acidity and pH levels, indicating its good anti-ulcer activity.** It protects against helicobacter pylori, a type of bacteria known to be associated with gastric ulcers.

- **Being a good support for respiratory system** also enables propolis to help with respiratory tract infections, having the ability to fight bacteria responsible for infections.

HDI understands perfectly how propolis can benefit you. That's why HDI ensures you with good, pure and clean propolis with its state-of-the-art processing and extraction methods. Many propolis extracts in the market have been processed under high temperature, so more than 60% of the active ingredients have been destroyed by heat. For **HDI Bee Propolis** and **HDI Propoelix™**, special extraction processes are carried out at low temperature, effectively removing all impurities in the raw propolis, while preserving the bioactivity of propolis and its nutrients.

HDI Bee Propolis and HDI Propoelix™ also have a strong Oxygen Radical Absorbance Capacity(ORAC) value, where a high value indicates high antioxidant content. 1 gram of HDI's propolis has been tested to have 400 times more antioxidant strength than 1 gram of oranges. **HDI Propoelix™** has an unbelievably high ORAC value of 21,921µmol TE / gram. **That's more than double** of all other propolis supplements sold in the market today.

您可知道蜂巢是地球上唯一无菌的地方？

这是因为有蜂胶的存在。

蜂胶具有强力抗氧化和抗菌功效，所以也被称为“俄罗斯盘尼西林，是最强力的天然抗生素。除了对蜂蜜有效益，这取自蜂巢的奇妙珍品对人类也有很大的帮助。

我们体内有一个复杂的免疫系统保护自己。但还是会时常生病。在我们居住的环境存在着上百万的细菌，病毒和毒素。每每让我们很容易就会感染上从不同国家传播而来的严重流感病毒。这些流感病毒导致不少人死亡，疫情十分严重。人体的免疫系统无力有效对抗我们周遭环境的大量细菌。

- **蜂胶的主要功能是帮助提高人体的免疫系统。**长期服食化学抗生素使您的免疫系统功能变差，因为细菌会产生抗拒性，但蜂胶就不同。它可以自然提升人体的免疫系统功能，增加免疫细胞的数量和功能。它的强力抗微生物功效有助消灭和抑制细菌，霉菌和病菌的成长。让我们不容易生病。即使患上了感冒，服食蜂胶会让我们痊愈得更快！
- **研究发现蜂胶具有强力抗氧化功能。**蜂胶可中和环境中的游离基，有效对抗抗氧化过程。抗氧化剂被公认为可预防慢性疾病如癌症心脏疾病和老人痴呆症。
- **蜂胶对伤口及炎症有帮助。**发炎是身体对感染的反应。蜂胶具有最佳的抗炎功能，有助消炎和加速伤口愈合。
- **因生活方式和饮食不均衡，许多人面对高胆固醇问题。**蜂胶可帮助降低坏胆固醇和甘油三脂水平，同时提升好胆固醇。有助保护心脏健康。

- **蜂胶也可修补损坏的胃部组织，中和胃酸和酸碱水平，发挥它的抗溃疡功能。**蜂胶也能对抗引起胃溃疡的幽门螺旋杆菌。
- **对呼吸系统有帮助。**蜂胶可消灭感染细菌，防止呼吸道发炎。

HDI充分了解蜂胶对人体的功效。因此HDI采用尖端科技处理方式，生产品质优良，纯正和洁净的蜂胶。许多在市场上的蜂胶经过高温处理，超过60%的活性成分已被破坏。**HDI 蜂胶和HDI Propoelix™**经过低温特别处理过程，有效清除未加工蜂胶里的杂质，同时保留蜂胶原有的活性分子及营养素。

HDI蜂胶和HDI Propoelix™含有极高的抗氧化活性指数(ORAC)。指数越高，抗氧化功能就越高。一克**HDI蜂胶**比一克的鲜橙高出400倍的抗氧化功能！**HDI Propoelix™**具有令人难以置信的高ORAC值21,921μmolTE/克。这是现在市场上所售卖的其他蜂胶辅助品的**两倍**以上。

Propoelix™ helped me recover from chronic Gastritis 让我的慢性胃炎痊愈了

For 35 years I have been suffering from Gastritis. Usually when I had a relapse I would take the anti-gastric tablets that are sold in pharmacies. However, in December 2019 I suffered from severe heartburn and had to be hospitalized 3 times within that period.

I met a HDI Enterpriser and he suggested that I take HDI Propoelix™, Clover Honey, Pollenergy 520 and Liquid Royale Jelly. After consuming these HDI products for 2 weeks, I felt the great difference. Before consuming the products I was bedridden and not able to move around. After taking HDI products, I was able to walk again and return to my normal activities. Now I no longer need to take any medication. HDI products are truly amazing!

过去的35年里，我一直患有胃炎。通常，当我复发时，我会服用在药店购买的胃药片。然而，在2019年12月，我胃灼热变得严重，在此期间不得不住院3次。

后来，我遇到了一位HDI的营销商，他建议我服食HDI Propoelix™，苜蓿蜂蜜，520活力花粉和液状蜂皇乳。服食了HDI的产品两周后，我立即感受到了分别。在服食HDI产品之前，我必须躺在床上，无法四处走动。但是，服食了HDI产品后，我能够走动了，并恢复日常活动。现在我不需要再服用药物了。HDI产品确实是最好的！

Propoelix™ helped me recover from COVID-19 让我的新冠肺炎完全康复了

I was having cough, fever, shortness of breath with no appetite and fatigue for 2 days. I did a rapid test as my symptoms were quite worrying. Due to this, I was advised to have a swab test and it confirmed I am Covid-19 Positive. When I was hospitalized, I have discovered that I have diabetes with HbA1c level =11.3, made me even more worried.

My son recommended me to take HDI Propoelix™, Clover Honey and Pollenergy 520. After consuming the products, my fever subsided after 2 days, breathing problem gone after the 3rd day and cough went away after a week. My doctors allowed me to self-isolate at home after my rapid recovery. Since then, I am symptom-free and my condition has normalized. I was retested and it confirmed I have fully recovered.

我经历了两天的咳嗽，发烧，呼吸急促，没有食欲和疲劳。由于我的症状比较严重，所以，我被建议去做拭子测试，最后测试结果呈阳性。当我住院时，我发现我的糖尿病水平HBA1c是11.3，这让我更加担忧。

我的儿子介绍我服食HDI Propoelix™，苜蓿蜂蜜和520活力花粉。服食了两天后我的烧退了，在第三天我也没再呼吸急促了，一个星期后，咳嗽也没有了。我的医生也因为我恢复得快，所以让我回家进行自我隔离。自从那天后，我再也没有难受的症状，而且我的情况也稳定了很多。我再次进行测试，结果证实我已完全康复了。
